

## Improve Your Water Filtration System with Hydro-Safe QT!

### Performance, Taste, and Profitability Can Be Negatively Affected with a Poor Water Filtration System

**Quarter Turn Feature:** Replace Your Filters in Less Than 1 Minute!

**Flow Rate & Capacity:** Other Systems Can Only Improve Your Water Capacity by Reducing Your Flow Rate. Dormont Offers Improved Flow Rates AND Higher Capacities, Giving You More Time Between Filter Changes!

**Multi-Stage Systems:** Allow for Up to 5 Stages, Giving You Optimal Filtration!

**OneFlow Anti-Scale System:** Scale Buildup Decreases Appliance Performance, and Increases Maintenance Costs. The OneFlow System is Designed to Neutralize Hard Water Conditions, So They Can Flow Through Your Appliances Without Building Up!

#### For Counter Top Steamers

**Model:** QTSTMMAX-2S-1M  
**Flow Rate:** 1.5 Gallons Per Minute  
**Capacity:** 15,000 Gallons  
**Stages:** 3

\* Including 1 Sediment Prefilter, 1 Carbon Block Filter, and the OneFlow System

#### For Combi Ovens & Floor Steamers

**Model:** QTSTMMAX-3L-1M  
**Flow Rate:** 3 Gallons Per Minute  
**Capacity:** 44,000 Gallons  
**Stages:** 4

\* Including 1 Sediment Prefilter, 2 Carbon Block Filters, and the OneFlow System
