

ConserveWell Dipper Wells

Now with Countdown Timer!
Saving Money, Water and Energy

The ConserveWell dipper well holds utensils above 140°F to prevent bacteria growth without continuous flowing water going down the drain

- Ideal for safely rinsing and holding knives, scoops, spoons, tongs and hand scoop ice cream dishes
- New programmable countdown timer aids timely water change-outs
- Only uses 600 gallons of water per year compared to 250,000 gallons per year with conventional options
- Available in drop-in or wall mount design
